## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-33 and 35-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Ulrich (US Patent 5,409,488). Ulrich discloses a fixation apparatus and method that provides a spinal implant rod (1), a fixation connector assembly (see entire Fig. 2), with a connecting member (2) and a post (7) and multiple portions, and wherein the connecting member has structure for slidable engagement of the rod, and a fixation connector (4) is able to prevent sliding movement (see col. 3, lines 10-20). The device is able to be secured to vertebrae and thus may be attached to respective facet joints if one chooses to do so. The device may also be adjusted postoperatively, disclosed as that the vertebrae may be independently set and fixated but may continue to adjust afterwards. (Col. 1, lines 50-70, and Col. 2, lines 22-27). Additionally the device may accommodate various angles (Col. 1, line 61) and/or planes, such as the sagittal plane (Col. 1, line 60). Fig. 2 also shows the device having multiple assemblies. It is inherent that this device follow the motion of the spine.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3733

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ulrich in view of Taylor (US Patent 6,685,705). Ulrich discloses the claimed method except for the step having a crosslinking member. Taylor discloses a cross linking member portion (2), that enables attachment between two spinal rods (see col. 2, lines 15-30). It would have been obvious to one having ordinary skill in the art at the time the invention was made to perform the method of Ulrich having at least the cross linking portion in view of Taylor to better connect the two portions of the spine with respect to their joints.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L. Swiger whose telephone number is 571-272-5557. The examiner can normally be reached on Monday through Friday, 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/720,659
